RECEIVED

AUG 31 2004

Federal Communications Commission
Office of the Secretary

Commissioner Abernathy:

There are far too many TV programs with too much violence. Children and even adults are allowing violent thoughts and images to be absorbed into their thinking, leading to crime laden actions that take place increasingly in our society as a result. These programs should be ended. Two examples: Fox's "24" and CBS' "CSI". Isn't "the news" already violent enough, without adding fictional stories to it.

Sincerely,

Ruth Pierce

Commissioner Abernathy:

I sincerely believe the level of violence streaming into our homes via so-called entertainment by the networks and cable channels has a bad influence on all of society. How many incidents of copy-cat assaults, rapes, and murders do we have to endure before we realize the formula for the crime came from some writer claiming to be producing entertainment.

You have the authority, and opportunity to make a difference. Do you have the intestinal fortitude to act in the face of sure ridicule from the ACLU, et al who want to destroy this country??

Sincerely,

Bobby L. Reed

Commissioner Abernathy:

I think that you should take another look at what violent programming is doing to our society. There is a level of violence all around us which is increasing every day.

I have seen the effect of violence on my own children. Mine children became angry and aggressive when watching violent programming. So I did not allow them to watch it.

They are now grown and have children of their own whom they do not allow to watch any violent programming at all. In fact, they do not allow more than 1 hour per day of tv, period. The grown ups do not watch it themselves.

I believe that we need to call a halt to violent programming for children and adults.

Study your history and see what violence did to Roman society. It was a great part of the reason for its fall.

Sincerely,

Martha Gibson

Commissioner Abernathy:

I am definitely opposed and offended by violent t.v. programming. Americans are being desensitized to the violence and children also and become more violent themselves. I notice a difference in my own children and their behavior when they watch shows that have some violence in it. Do you want your children to watch violent shows nonstop all time? I don't think so! what happened to being kind and showing love in American families. I for one want clean, decent programming that my whole family can watch or if a friend or neighbor comes over, I am not embarrassed and turn it off. We don't need the sex, violence, or bad language.

Sincerely,

Faye Mosher

Commissioner Adelstein:

We definitely needs controls on the violence seen on television as well as the vulgar language. Our children are exposed to these situations on TV no matter how well we try to monitor what they watch. This is because it is becoming common place on virtually every channel. I believe that parents have a responsibility for trying to control the viewing habits of their children, but it is very difficult because of the amount that is prevalent on TV today. It compares to the internet. The task of monitoring what our children watch or read is almost impossible. If we were to block the channels on TV and the sites on the internet that are harmful to our children, we might as well cancel our cable and internet connections. As far as "if" it is harmful, I believe that this is a no brainer. The crimes that "children" are committing today have been linked to what they watch and hear and read. This conclusion is from their own mouths. They tell us they were only acting out what they saw on TV. This isn't a question of what is right for the producers and the people making money on these programs. It is a question of what is morally right. We have a moral right to expect decent material to be sent over our airways. If the FCC doesn't do something about this situation, the only other alternative we have is to boycott the companies that sponsor this trash on TV.

Sincerely,

Paul Stapleton

July 31, 2004

Commissioner Kathleen Abernathy
445 12th Street SW
Washington, DC 20554

Commissioner Abernathy:

I appreciate the opportunity to express my views about violence on television. I am a grandmother of an eight and four year old. My daughter was recently going through some of my mother's things after her death. Included in her personal things are photograph's of my husband's vehicle after a drunk driver hit him head-on nearly 18 years ago, pictures I have chosen never to see. Three people were killed in that wreck, including my husband. Both of my grandchildren were present at the time my daughter was going through my mother's things and caught only a glimpse of their grandfather's truck. Since that time, they have both dreamed of the horror that that picture has planted in their little minds and talk incessantly about it.

Both my daughter and her husband as well as myself are careful about what their little minds and eyes are exposed to. But even on "Nick at Night" and TV Land, we still have to contend with public service announcements about two men using condoms to cut down on the exposure to aids and regular commercials pushing tampons and viagra, something I thankfully never had to contend with when I was growing up. Just because information is out there is no indication that young children must be exposed to it.

Please do something about violence on television. We all may have a "right to know," but that does not mean that we all want to know. For a change, let those who want this type of entertainment have to search for it far away from the reach of little ones, instead of the burden being placed on those of us who desire some good old-fashioned, values-filled television having to be the ones to search such entertainment out, only to find very little of it remainings on our airwaves. Thank you.

Sincerely,

Just because information is out there is no indication that young children must be exposed to it.

Please do something about violence on television. We all may have a "right to know," but that does not mean that we all want to know. For a change, let those who want this type of entertainment have to search for it far away from the reach of little ones, instead of the burden being placed on those of us who desire some good old-fashioned, values-filled television having to be the ones to search such entertainment out, only to find very little of it remainings on our airwaves. Thank you.

Sincerely,

Penny McKinney-Smith
